

EXPANDED INJURY AND ILLNESS RECORDKEEPING SOP

your company – Compliance with OSHA 2026 Standards

1. PURPOSE

This SOP outlines your company's updated recordkeeping and reporting standards in response to OSHA's 2026 regulations. It ensures transparent, accurate, and timely documentation of all workplace injuries, illnesses, and near-miss incidents in accordance with expanded federal requirements.

2. SCOPE

Applies to all employees, subcontractors, and job sites involved in exterior cleaning, drone operations, soft washing, and pressure washing activities under the your company banner.

3. OSHA 2026 KEY RECORDKEEPING REQUIREMENTS

- Expanded documentation requirements for all injuries and illnesses, including detailed environmental and operational data at time of incident
- Mandatory inclusion of digital evidence when available (photos, videos, sensor data)
- Increased OSHA inspection activity targeting high-hazard industries like commercial cleaning
- Submission of specific data to OSHA for inclusion in public transparency portals

4. INCIDENT & ILLNESS REPORTING REQUIREMENTS

- All incidents must be reported to the site supervisor and logged within 24 hours
- Use of jobsite photos, equipment data logs, and crew witness reports encouraged
- Integrate Red Alert audio alarms and Man Down detection recordings into incident files when available
- Maintain digital backup of OSHA 300, 300A, and 301 forms in secure cloud storage
- Submit required incident data through OSHA's Injury Tracking Application (ITA) for qualifying events

5. INVESTIGATION & FOLLOW-UP

- All serious incidents must trigger a root-cause investigation within 72 hours
- Designated safety officer must complete an incident review form and implement any policy or training changes
- Record any environmental factors: temperature, wind speed, surface type, chemical exposure
- Note whether powered equipment (drone, pump, remote systems) was involved and functioning properly

6. RECORD RETENTION & TRANSPARENCY

- Records must be retained for a minimum of 5 years from date of incident
- Records must be accessible for internal audits and external OSHA review
- Updated SOPs and safety actions should be documented and stored alongside the original report
- Anonymous summaries of recordable incidents may be used for internal safety meetings

7. CONTINUOUS IMPROVEMENT

your company will conduct quarterly audits of incident logs and reporting processes to ensure compliance. Findings will be reviewed by leadership and integrated into future training, equipment design, and risk prevention strategies.
